Duble-stranded cDNA was prepared from cell line RNA.
5; and 3; adaptors were used in cloning as follows: 5;
adaptor sequence: 5; -CACGGCCATTATCGCC-3; and 3; adaptor sequence: 5; -CACGGCCATTATCGCC-3; Adaptor sequence: 5;

Total number of hits satisfying chosen parameters:
                         Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 1472140 seqs, 8248589755 residues
